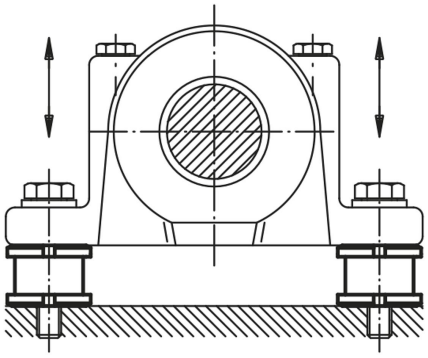
K0694

Levelling sets low version

Item description/product images



Description

Material:
Steel 1.7225.
Stainless steel 1.4305.

Version:
Seel version trivalent blue passivated.
Stainless steel version bright.

Note:
Low height levelling sets are used for mounting, levelling and aligning motors, aggregates, drive units and assembly lines. The advantage is the low overall height, which means that alignments can be carried out easily and precisely even with several support points. This permits precise and torsion-free alignment.
The static additional load F1 is effective after deducting the tensioning force (screw 8.8, μm = 0.125) from the total load F.

Accessory:
K0787 Hook wrench with lug, DIN 1810A enhanced.
