

Low-profile clamps

Item description/product images

Description

Material:

Steel.

Version:

Hardened, black oxidised.

Note:

Due to their flat construction, these handy low-profile clamps are suitable for machining the majority of workpiece dimensions. Due to the wedge effect, the hardened jaws clamp simultaneously forwards and downwards.

The clamping forces F and F_1 are achieved under optimum configuration and utilisation of the maximum fastening screw tightening torque.

Supplied in pairs.

Supplied with:

- 2x low-profile clamps.
- 4x DIN EN ISO 4762-10.9 fastening screws.
- 4x DIN 508 T-slot nuts.
- 2x ISO 2936 hex socket keys.
