

LOCATIONS

HEINRICH KIPP WERK is located in Germany. This is where the production takes place and the fully automated, high-performance logistics centre is situated. Internationally, the corporate group is currently represented by 9 company branches. International orientation is a corporate goal.

In addition, more than 50 permanent agencies service all major international markets. Some of these have been your local contact partner for decades.

OPERATING PARTS | STANDARD ELEMENTS

HEINRICH KIPP WERK is your reliable partner for standard elements and operating parts.

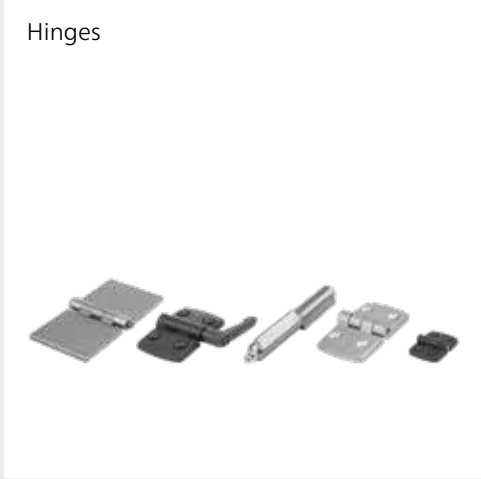

The simple and self-explanatory KIPP LOGIC in the catalogue, CAD databank and internet simplifies finding the correct product. Comprehensive service through our customer advisors, engineers and technicians is always available for you. This applies to the standard products from our comprehensive catalogue as well as for individual special solutions.

You are always in safe hands with KIPP. With products you can rely on.

Quarter-turn locks, compression latches, edge protection profiles

Hinges

Swivel feet, levelling feet

Tube connectors, profile connectors

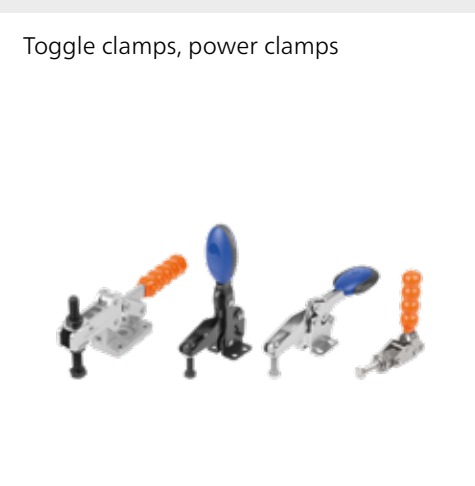

Telescopic slides

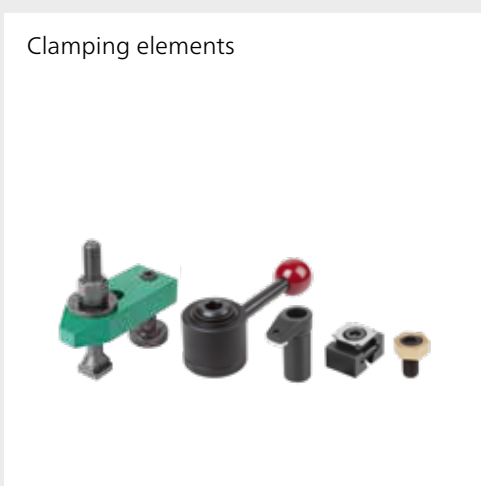

Latches

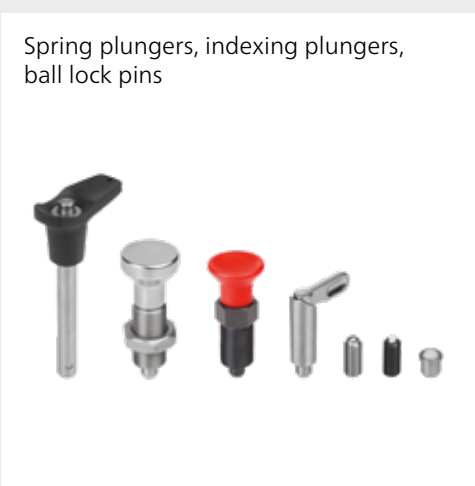

Toggle clamps, power clamps

Clamping elements

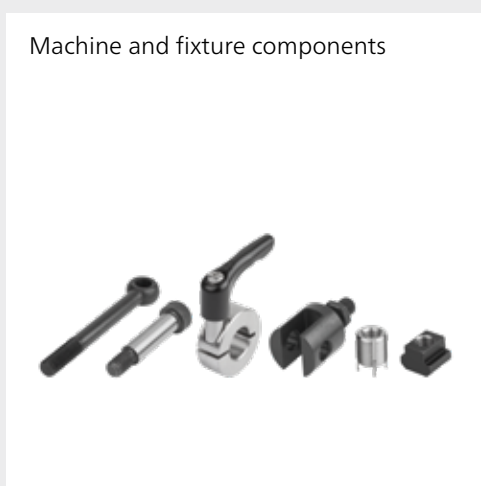

Spring plungers, indexing plungers, ball lock pins

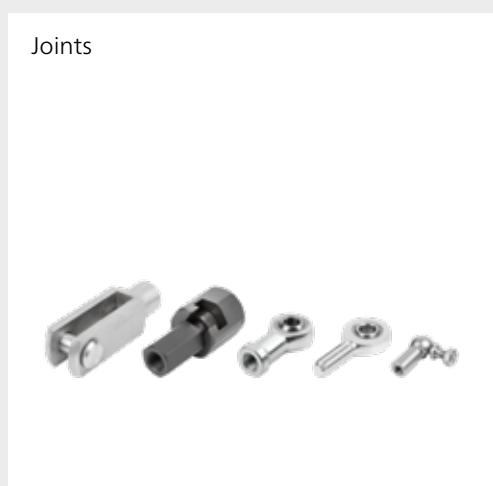

Support elements, locating elements, stop elements

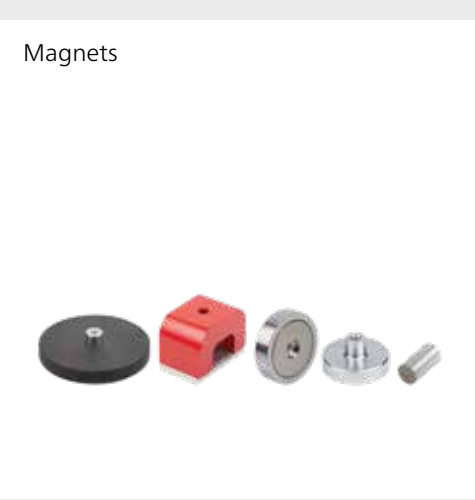

Machine and fixture components

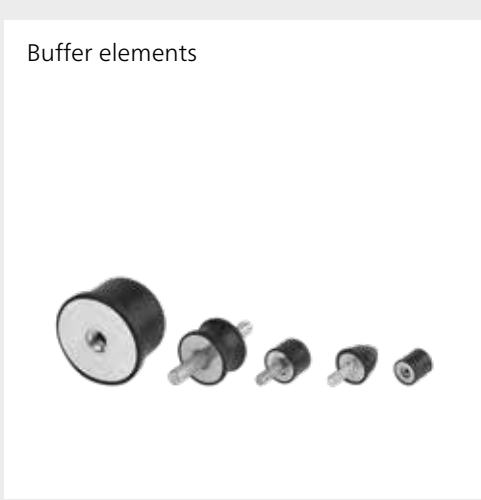

Joints

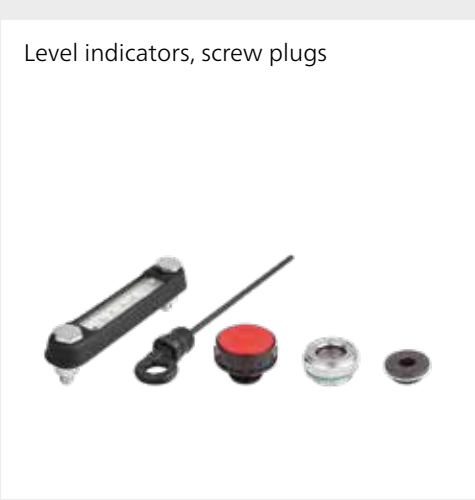

Magnets

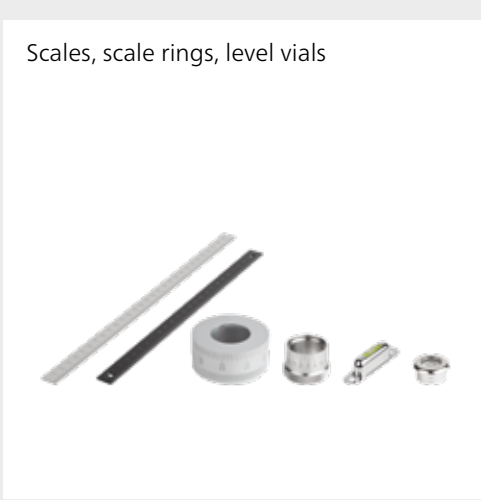

Buffer elements

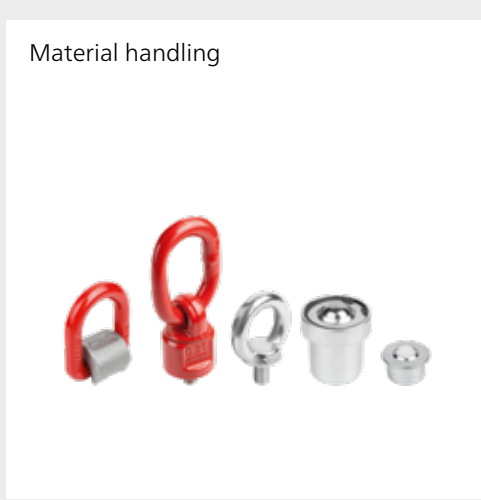

Level indicators, screw plugs

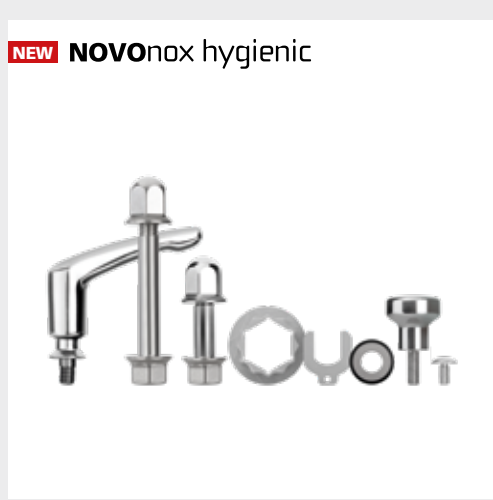

Scales, scale rings, level vials

Material handling

NEW NOVOnax hygienic

SPECIAL SOLUTIONS

HEINRICH KIPP WERK has extensive production resources. This is why we can produce special solution construction groups and single items at any time that exactly suit customer specifications.

In our machine shop are metal cutting, injection molding and zinc die-casting machines. Our own R&D department and toolmaking workshop ensure a professional realisation of special projects. Completely assembled and, if desired with treated surfaces. Technicians accompany every single project - during the offer preparation, feasibility assessment and all the way through to completion.
