Turnbuckles, steel, for chain clamp sets

Item description/product images

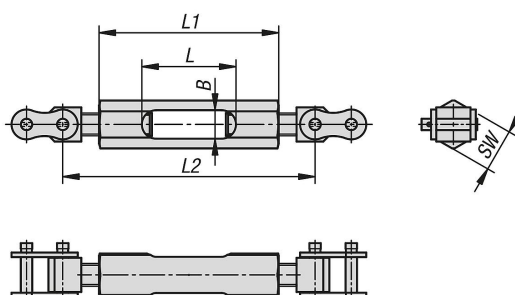

Tension chain

workpiece

Turnbuckle

Clamping hook

Clamping prism
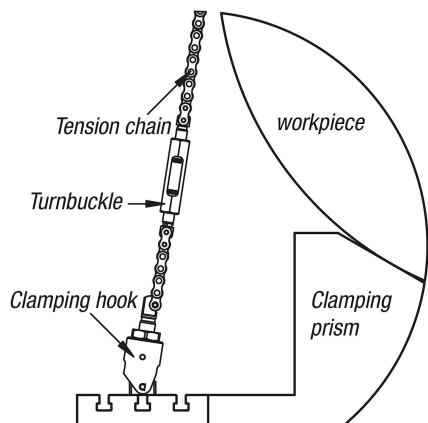

Description

Material:
Steel.

Note:
Steel turnbuckles for chain clamp sets are mounted between the chains. The turnbuckles are used to pre-tension the chain and remove any play, which is always greater with longer chains.

Accessory:
Steel roller chains for chain clamp sets K1655.
