HEINRICH KIPP WERK

NEW

ESD

ELECTRICALLY CONDUCTIVE PRODUCTS

Optimal protection for sensitive components

NEW ESD

The new ESD range from KIPP was specially designed to give the highest possible protection for ESD sensitive components.

Sensitive electric or electronic equipment, components and devices may be damaged or destroyed by electrostatic discharges (ESD) in the immediate vicinity.

These products can be used for ESD applications or in ESD protection areas (EPA) in accordance with DIN EN 61340-5-1. The yellow ESD logo is printed on the side of the product to clearly identify it.

ESD products can also be used for devices, components and protection systems in areas with high risk of explosion. Use of these elements prevents the occurrence of electrostatic spark discharges, eliminating the potential ignition of gases and dust which could lead to explosions in enclosed spaces. These ESD products are certified by TÜV-Süd in relation to their electrical discharge capability.

ESD ensures high safety for device manufacturers required to conform to ATEX product directive 2014/34/EU and operators required to conform to ATEX operating directive 1999/92/EG.

- + Electrically conductive
 - + For use according to DIN EN 61340-5-1
 - + Products with proven KIPP design
 - + Complies with ATEX-product directive 2014/34/EU
 - + 100% KIPP quality
-
- = Safety with quality and effect

Application:

KIPP products with the ESD logo protect sensitive electric and electronic equipment, components and devices in many branches.
