

Latches adjustable heavy-duty version

Item description/product images

Description

Material:

Steel.

Version:

Trivalent blue passivated.

Note:

Heavy-duty forged latches for high tensile loads. Primarily used on utility vehicles, agricultural and construction machinery. A ratchet prevents unintentional opening when closed.

To compensate for tolerances or to create enough tension the bail can be adjusted using the spindle D1.

Order required catch plate version separately.

The retaining force F1 applies to the latch, not the catch plate.

Accessory:

Catch plate K0052.
