

Recessed handles, plastic

Item description/product images

Description

Product description:

The ergonomic form of the recessed handle is ideally suited for appliances and housings.

It is installed by pressing in and clipping into the mounting opening.

Material:

Thermoplastic (ABS).

Version:

black.

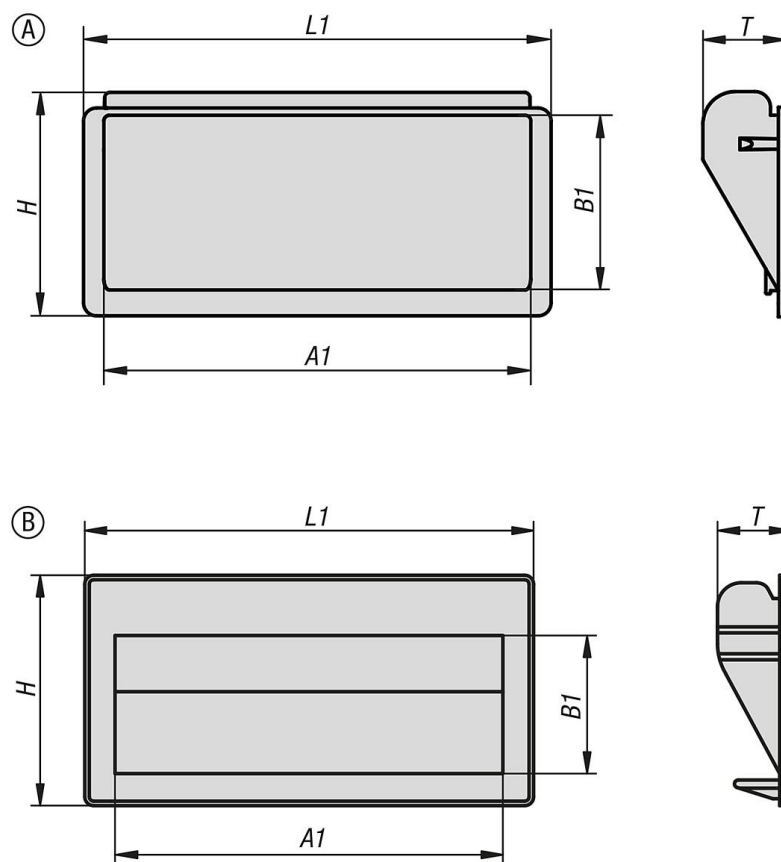

Note:

This handle can be used with a wall thickness of 0.75 to 1.5 mm.

The retaining force is 750 N per pair for steel and sheet steel housings.

K1077.1101 is supplied with spring clips for mounting on the inside wall of the housing.
