

Clamping claw sets for multi-clamping system

Item description/product images

Description

Material:

Carbon steel.

Version:

Tempered. Support faces ground (HRC 32).

Note:

Using these clamping claw sets, the clamping rails can be secured at any position on the machine table.

Application:

The clamping claw set is inserted into the T-slot on the machine table and slid along to the desired position on the clamping rail. Tightened using a cap screw.

Advantages:

The clamping claw set can also be used for other types of mounting in the multi-clamping system.

Supplied with:

4x clamping claws.
4x DIN 912 cap screws.
4x DIN 508 T-slot nuts.
