

## Extension cable for WLAN antenna

### Item description/product images

### Description

#### Product description:

The coaxial extension cable extends the deployment area for WLAN antennas. It can be used between the Gateway K1494 and the magnetic base for WLAN antennas K1845. It is therefore possible to set up the antenna outside the switch cabinet, which improves signal reception.

#### Version:

RP-SMA plug to RP-SMA socket.  
Cable length 5 metres.

#### Technical data:

CFD200 coaxial cable.  
Signal loss 0.3 dB/m.  
Contacts gold plated.

#### Advantages:

- RP-SMA socket to RP-SMA plug
- Signal loss 0.3 dB/m
- Gold-plated contact
- CFD200 coaxial cable

#### Accessory:

Accessory Gateway K1494.  
Magnetic base for WLAN antenna K1845.
