

NC vice jaw width 125 mm

Item description/product images

Description

Material:

Body and jaw holder mild steel.

Version:

Hardened and ground all sides.

Features:

NC vices can be used for a wide range of clamping tasks:

- Repeat accuracy ≤ 0.01 mm
- Fixed jaw locked in all directions (X,Y,Z)
- Vertical use directly on the machine table
- Wide clamping range by using attachment step jaws
- Can be laid on the side, with fastening holes for slot spacing of 63 mm and 100 mm
- Quick pre-adjustment of the clamping range using locking pins
- Basic equipment includes two reversible screw-on jaws and one crank handle
